micuna
magic ideas for children

The background of the entire page is a repeating pattern of light blue watercolor-style teardrop shapes. Each teardrop has a soft, painterly texture with subtle variations in color and shading, giving it a gentle, organic feel. The teardrops are scattered across the white background, creating a sense of movement and depth.

Welcome

Welcome

Micuna is a family business with over 45 years of experience in furniture design and manufacturing for babies. We are located in the Albufera natural park in Valencia. Since our foundation, we have had a special respect for the environment, baby safety and balancing family and life for working parents. All our products are made of wood obtained from ecological forests to continue to ensure a green planet for our children. We are a market leader in Spain and the fifth European company recognized for our products and growth. Currently our products are sold worldwide. Relax Cot

Relax System

Discover all the benefits of the Relax System

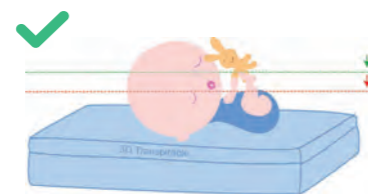

The inclination improves breathing, reduces the pressure exerted by the head on the mattress, reduces the possibility of positional plagiocephaly, helping digestion and reducing regurgitation. This system provides the baby with a safer position: sleeping on their back, avoid dangerous situations like mask effect and semi incorporated position, reduces CO2 rebreathing.

Complement with articulated mattress for two inclinations: 7° and 10°(P. 112)

FACE UP position.
 This position reduces sudden infant death syndrome. Also reduces CO2 rebreathing.

RELAX SYSTEM position
 To reduce rebreathing of CO2, babies should be placed at a reclined angle.

X FACE DOWN position
 WHO recommends a face up position for babies to ensure safe and secure sleeping.

X On a SIDE position
 Sleeping on your back reduces the mask effect, whereby a soft or padded material can adapt to the face of Baby preventing your breathing.

..... O2 air
 Higher CO2 concentration

We investigate World Recommendations about baby's sleep, applying them to our products and guaranteeing rest and safety.

Check the 'Other accessories' section to see if your model is compatible with this accompaniment.

Baby Nest

Breastfeeding pillow

During breast and bottle feeding period, it helps the Mom to place their baby in a comfortable position. In addition, it avoids annoying and uncomfortable postures relieving back and arm pain, it helps to transmit peace of mind and calm to the baby

Hammock / Co-Sleeper

It is perfect for co-sleeping with parents and allows for maximum calm and security while sleeping. When the baby grows and begins to sit, it can also be used as a hammock

Pregnancy pillow

When sleeping on the left side, it avoids the pressure of body weight on the vena cava which in turn, aids the pumping the blood to the placenta and provides more oxygen and nutrients to the unborn infant

The interior is made of a comfortable and moulding material which has a feather-like texture, allowing to adapt to any posture. It is breathable and thanks to its zipper, can be easily used in all positions

Baby Nest

In addition, Baby Nest is a cot reducer for the first months of the baby life when feeling safe and protected is vital

BABY NEST TX-1869

Trotta
LEARNING TOWER

★ **Seat**

Trotta is also a seat, placing the upper step in its inclined position.

★ **Stairs**

In the first position, Trotta is a three rung ladder, perfect for small adventurers. The bottom step can be folded inwards, when the child does not need it and to save space.

★ **Evolutional**

The second position is designed to accompany the child as they grow. Thanks to the new Trotta guide system, you can change its functionality with very simple and intuitive movements, and without using any other tools. With a simple slide, the upper step becomes a hidden step, reducing the height.

★ **Learning**

The sides contain a fun game for the child to discover letters, numbers and basic geometric shapes, following them with your tracking ball. This system will allow children to take the first steps of writing and drawing at their own learning pace

Seguridad y Sostenibilidad

En **micuna** los controles de calidad para la seguridad son muy exhaustivos. Todos nuestros productos antes aparecer en nuestros catálogos, son enviados a los institutos tecnológicos de calidad controlada de AIDIMME y AIJU, que cuentan con el equipamiento y los laboratorios más avanzados de Europa garantizando el cumplimiento de las normativas de seguridad europeas para cunas y mobiliario infantil.

Nuestra materia prima principal es la más ecológica y renovable que disponemos en el planeta, la madera. En **micuna** disponemos de un Sistema de Control de la Cadena de custodia de productos forestales utilizados para la fabricación de nuestro mobiliario infantil, certificado por PEFC ESPAÑA.

La cultura de la seguridad, la sostenibilidad y la calidad forma parte de nuestra identidad y valores, transmitiéndose desde el diseño, innovación y fabricación responsable. Además, gracias a nuestra instalación de autoconsumo energético de paneles solares fotovoltaicos, estamos produciendo así energía limpia y sostenible, y reduciendo nuestra huella de carbono.

Ésta es nuestra aportación a la seguridad y la sostenibilidad a través de una visión comprometida con la infancia y nuestro planeta.
